  ◉ Other Guidance

Summary of Change: Clarification of ambiguous guidance for what safety requirements are needed for software developments.

Reason for Change: Section 5.4.2 currently requires a "development assurance level" but gives no direction what it is or what to do with it. The guidance is clarified to specify the development of a safety assessment for software and what to do once that is determined. If there is no safety hazard the default is to do no extra work other than the analysis.

Development, Review, and Concurrence: Larry Greene (AJI-314), George Gardner (ANG-B6), Scott Chapman (AJI-314), ASAG

Target Audience: Program Management Office

Briefing Planned: Yes

ASAG Responsibilities: Review and comment.
